

TL3

Plate heat exchanger

Applications General heating and cooling duties.

Standard design

The plate heat exchanger consists of a pack of corrugated metal plates with portholes for the passage of the two fluids between which heat transfer will take place.

The plate pack is assembled between a fix frame plate and a movable pressure plate and compressed by tightening bolts. The plates are fitted with a gasket which seals the interplate channel and directs the fluids into alternate channels. The number of plates is determined by the flow rate, physical properties of the fluids, pressure drop and temperature program. The plate corrugations promote fluid turbulence and support the plates against differential pressure.

The plate and the pressure plate are suspended from an upper carrying bar and located by a lower guiding bar.

Connections are located in the frame plate or, if either or both fluids make more than a single pass within the unit, in the frame and pressure plates.

Typical capacities

Liquid flow rate

Up to 5 kg/s (80 gpm), depending on media, permitted pressure drop and temperature program.

Plate types TL3B, TL3P TL3BD, double wall plates

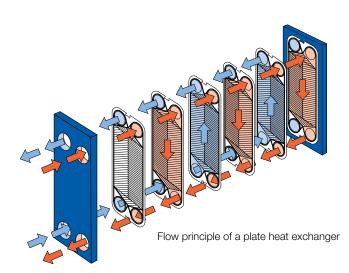

Frame types

FG

Working principle

Channels are formed between the plates and the corner ports are arranged so that the two media flow through alternate channels. The heat is transferred through the plate between the channels, and complete counter-current flow is created for highest possible efficiency. The corrugation of the plates provides the passage between the plates, supports each plate against the adjacent one and enhances the turbulence, resulting in efficient heat transfer.

STANDARD MATERIALS

Frame plate Mild steel, Epoxy painted

Nozzles

Pipe: Stainless steel, Titanium

Plates

Stainless steel Alloy 316 / Alloy 304, Titanium Alloy 254 SMO, Alloy C-276

Gaskets

TL3B Nitrile, EPDMP, HNBR, EPDMFFTL3P Nitrile, EPDMP, HeatSeal™, HNBR, Viton®GTL3BD Nitrile, EPDMP, EPDMFF

TECHNICAL DATA

Pressure vessel codes PED, ASME, pvcALS™ Mechanical design pressure (g) / temperature

FG	pvcALS™	1.6MPa / 180°C
FG	PED	1.6MPa / 180°C
FG	ASME	150 psig / 356°F

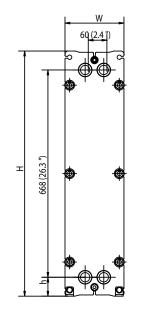

Maximum heat transfer surface

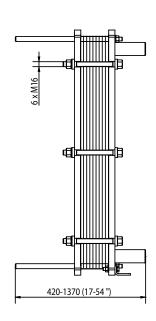

10.9 m² (117.3 sq.ft)

CONNECTIONS

FG	PED	Size 11/4"	Pipe, thread ISO-R 11/4"	
FG	pvcALS™	Size 1¼"	Pipe, thread ISO-R 1¼" and NPT 1¼"	
FG	pvcALS™	Size 1¼"	Internal thread ISO-G 1¼", carbon steel	
FG	ASME	Size 11/4"	Pipe, thread NPT	

Dimensions

Measurements mm (inch)

Туре	Н	W	h
TL3-FG	790 (31.1")	190 (7.5")	61 (2.4")

Particulars required for quotation

- Flow rates or heat load

Temperature program

- Physical properties of liquids in question (if not water)
- Desired working pressure
- Maximum permitted pressure drop
